Re: Meridian Brick – 3820 Serr Road, Sections 22 & 23

Dear Mr. Piggott:

Please find attached plans for expanding the mining operations on Serr Road for Meridian Brick. Attached are 10 sets(11x17) of site plans, the site plan application, and an SUP application. Meridian Brick will be mailing the application fees separately.

The properties surrounding the proposed excavation area are all owned by the same property owner, US Brick. The excavation would connect to existing interior haul roads to the existing operations building.

There are existing wetlands within the project area and a portion of the site is within the 100 year regulated floodplain. EGLE(former MDEQ) permit plans and applications will be prepared and submitted prior to any disturbance to those areas. Those regulated disturbances are not expected for many years; however, the intent would be to submit for EGLE approval within the next few months.

If you should have any questions regarding the plans or need additional information please do not hesitate to contact me at (517) 339-1014, or you can email me at ajpatrick@kebs.com.

Sincerely,

Allen J. Patrick, P.E.
